DIRECTIONS FOR USE

To apply 1 lb. of Potash per 1,000 sq. ft. to established turf, apply this product at the rate of 4.2 lbs. per 1,000 sq. ft. or 182 lbs. per acre. To apply 0.5 lb. of Nitrogen and 1.5 lbs. Potash per 1,000 sq. ft. to established turf, apply at the rate of 6.25 lbs. per 1,000 sq. ft. or 272 lbs. per acre.

Applications made during the summer should be "watered in" to prevent turf damage. Apply anytime as a soil application at the rate of 6.25 lbs. per 1,000 sq. ft. and "work in" to a depth of at least 2 inches. Supplemental applications of lawn fertilizer are needed to achieve a minimum 1 pound nitrogen per 1,000 sq. ft.

SUGGESTED SPREADER SETTINGS

Vicon PS 402	5	540	35 ft.	32	28	26

These settings were calibrated and field tested. However, age and condition of spreader, speed of operation, and evenness of terrain may require slightly different settings for desired coverage.

Fertilizer may cause irritation of eyes, nose, throat and skin. In case of contact with skin or eyes, flush with plenty of water; for eyes, get medical attention.

Keep out of reach of children.
